### Arrangement

The first half is divided into sections, each corresponding to an Enumerator's Schedule. The first one or two entries in each section gives the schedule itself ~ spellings are as in the original, but capitalisation & punctuation has been changed.

The remaining entries in each section summarise the places-related information recorded in the enumerators' returns of households, in 'as enumerated' order. Some of the detail will differ from that given in the Enumerator's Schedule :

- order is usually different
- spellings sometimes differ, and place names can be incomplete
- some place names may not appear ~ either the enumerator simply omitted them or, in the event, they were enumerated elsewhere in the returns

The entries summarising the enumerators' household returns give the following :

- **piece & folio** numbers : used with the PRO class (HO107) to locate the original
- **Dwelling** : name of one or more dwellings ~ 'Yards', 'Rows' and 'Terraces' are usually under this heading, although some may have been considered 'streets' and their names used as street names
- **Street** : names of streets, roads, etc, and some hamlets ~ 'Courts' and 'Places' are usually under this heading, although some may have been sub-divisions of a street
- **parish** : the ecclesiastical parish, abbreviated as noted below
- **locality** : the name of one of Thanet's towns or parishes. In some cases the information under this heading may be the only places-related information given in the original, and nothing is entered under 'Dwelling' or 'Street'

The second part, starting on page 19, is a combined Index of Dwellings and Streets, each entry giving **piece** and **folio** number(s).
